

ICTS Seminar

- Title : Bi-local Holography in the Sachdev-Ye-Kitaev Model
- Speaker : Junggi Yoon, ICTS-TIFR, Bengaluru
- Date : Thursday, October 6, 2016
- Time : 3:00 pm
- Venue : Nambu Discussion Room (Right), ICTS Campus, Bangalore
- Abstract : In this talk, I will describe previous work on Sachdev-Ye-Kitaev(SYK) model. I start from a brief introduction to collective field theory for vector model. Then, we discuss a bi-local effective action of SYK model and its spectrum in large N limit (and strong coupling limit).
