

ICTS Colloquium

Title : Evolution of Human Cognition

Speaker : LS Shashidhara, Indian Institute of Science Education and Research,
Pune

Date : Monday, February 19, 2018

Time : 3:00 PM

Venue : Emmy Noether Seminar Room, ICTS Campus, Bangalore

Abstract : It is unequivocal that similar to other organs/tissues, our brain too is a product of evolution. Likewise, similar to our morphological features, our behavioral manifestation too is a result of natural selection to ensure better survival strategies in fast changing environment. This talk would demonstrate similarities between human and other animals, as distantly related as insects, in higher order cognitive functions.
