

ICTS Seminar

Title : Building invariants in Geometry

Speaker : Ipsita Datta (ETH Zurich, Switzerland)

Date : Tuesday, 19 May 2026

Time : 11:00 AM (IST)

Abstract : Much of my work is based on developing algebraic and quantitative invariants that detect geometric behaviour. I will introduce the ideas that go behind developing such invariants, such as moduli spaces and their compactifications, and give examples where this philosophy is in action.

Venue : Emmy Noether Seminar Room
